Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ito et al. (6,210,193).

In regard to claim 1, Ito et al. discloses a memory card connector 1 for mounting on a printed circuit board (PCB) to electrically connect with a memory card 45, comprising: an insulative housing 2 being generally a flat cuboid with a lower wall 2a and three sidewalls (12 and a front part of L-shaped sidewall 14) thereby defining a receiving space with an opening end, a plurality of receiving grooves 7 being defined in the lower wall 2a; a plurality of terminals 5 (the front row adjacent 2b) received in the receiving grooves 7 of the housing 2, each terminal 5 having a contact portion 8, an interferential portion (mounted in the housing 2) and a soldering portion 9, the soldering portion 9 being located at the opening end of the housing 2, the contact portion 8 being away from the opening end of the housing 2 and slightly projecting from the receiving groove 7; and a shielding plate 4 covered on the housing 2, the shielding plate 4 and the lower wall 2a receiving the contact portions 8 of the terminals 5 cooperatively defining an insertion slot; whereby the memory card connector 1 electrically connects with the memory card 45 through slantwise inserting the memory card 45 thereto and

then rotating the memory card 45 to be received in the receiving space of the housing 2 and to press against the terminals 5.

Allowable Subject Matter

3. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: In regard to claim 2, the combination of claim 2 and claim 1 would render the claims unobvious over the prior art because Ito et al. does not disclose the opposite ends of one single longitudinal side wall connecting with two lateral side wall. In regard to claim 7, the combination of claim 7 and claim 1 would render the claims unobvious over the prior art because the Ito et al. does not disclose a guiding surface formed at the lower wall of the housing.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tho D. Ta whose telephone number is (571) 272-2014. The examiner can normally be reached on M-F (8:00-5:30).
